

# Massachusetts Youth Soccer Coach Education Week

Coastal Youth Soccer League is Co-Hosting two coaching education courses with Mass Youth Soccer Instructors.

This season we will be conducting these sessions using the US Soccer Coach for Community Model.

This program is focused on providing coaching education resources with the goal of helping local soccer leaders create better playing environments, increase participation, and retain players and coaches. The coach clinic will provide games and activities that can be used in your practice. It will model a practice from beginning to end with the goal of creating a positive player centered environment.

The field session will provide practical application of the Play, Practice, Play (PPP) methodology with Child Development and Player Development activities.
